

Assignment 2: User Story

Thursday, May 14, 2026 3:55 PM

Epic	Persona	User Story	Acceptance Criteria
(what is the theme, what group of problems are you solving)	(who is the user, who has the problems that you are trying to help solve using your website / app)	"As a ____ (persona) I want to (perform a task) so that ____ (achievement / goal)"	Given ____ (the context, pre-conditions, on what web / application page or exact section of a page) When ____ (an action / trigger) Then ____ (system behavior / system response as consequence / outcome)"
Sign Up	Hirer/Vendor	As a Hirer/Vendor I want to be able to sign up/register for the VV website using my name, email, and a password I create, so that I can log in in the future.	- Given the Hirer/Vendor opens the sign up page. When the page loads, then a form is displayed with fields including "name", "email", "password", and "confirm password". - Given the Hirer/Vendor is entering in an email, when they click the submit button, if the email format is invalid, then the system displays an error message. - Given the Hirer/Vendor is entering in a potential password, when they are entering the characters, then they should have a choice to show/hide the password. - Given the Hirer/Vendor enters in a potential password in the "password" and "confirm password" fields, when they click the submit button, if the form inputs do not match, then the system displays an error message. - Given the Hirer/Vendor enters a potential password in the "password" and "confirm password" fields, when they click the submit button, if the password is not strong enough/does not meet password requirements (1 upper case letter, 1 lower case letter, 1 special character, minimum of 6 digits), then the system displays an error message. - Given the Hirer/Vendor fills out all the input fields, assuming all input is correct, when they click the submit button, then the system registers the account and redirects the Hirer/Vendor to the Hirer/Vendor dashboard.
Sign In	Hirer/Vendor	As a Hirer/Vendor, I want to sign in to the VV website, so that I can use the website and it's features.	- Given the Hirer/Vendor enters an email and a password in each field, if the email and password are valid and correct, when they click the submit button, then the system grants the Hirer/Vendor access, displays a welcome message in the format of "Welcome [username]", and redirects them to their dashboard. - Given the Hirer/Vendor enters an email and a password in each field, if the email and password are invalid or incorrect, when they click the submit button, then the system displays an error message.
Log out	Hirer/Vendor	As a user, I want to log out of the system so that my account stays secure when I am not using it.	- Given the user is logged in, a log out link should be present on the header. - Given the user is logged in, when they click the log out link, the system logs them out and redirects them to home page.
Profile	Hirer/Vendor	As a user, I want to have a profile feature, so that I can view information such as my details and date of joining.	Given the Hirer clicks on the profile button, when the page loads, then it displays Hirer information such as name, email, an encrypted password field, profile photo, hire history, and join date.
Booking	Hirer	As a Hirer, I want to be able to filter through venues by recommended suitability, so that I can see venues suitable for my event.	- Given the Hirer selects a predefined suitability value, when they click the submit button, then the only displayed venues are the ones that match the suitability. - Given the Hirer doesn't select a predefined suitability value, when they click the submit button, then the system displays an error message.
Venue	Vendor	As a Vendor, I want to be able to perform CRUD operations on my venues, so that I can create, read, update, and delete my venues.	- Given the Vendor is on the Vendor dashboard, when the Vendor selects a venue, then the system redirects them to a separate page and displays information about the venue. - Given the Vendor is on the Vendor dashboard, there will be an option to create a new venue. When the Vendor clicks the create button, then the system will redirect them to a page allowing them

			to input information to create a new venue. - Given the Vendor is on a venue's page, there will be an update button. When the Vendor clicks the update button, then the system will redirect them to a page allowing them to input new information to update their venue. - Given the Vendor is on the venue's page, there will be a delete button. When the Vendor clicks the delete button, then the system will remove the venue from the system.
Venue	Vendor	As a Vendor, I want to be able to block off my venue within a selected timeslot, so that a hirer cannot book when the venue is unavailable.	- Given the Vendor is on their venue page, when they input dates and times to block off the venue, and click the block button, if the dates and times are valid, then the system displays a success message, and the status of the venue is blocked - Given the Vendor is on their venue page, when they input dates and times to block off the venue, if there are missing dates and times, or they are invalid, then the system displays an error message, or highlights the missing input boxes.
Venue	Vendor	As a Vendor, I want to be able to unblock my venue if it is blocked, so that once the venue becomes available, a hire can book.	Given the Vendor is on their venue page, if the status of the venue is blocked, the page shall display an unblock button. When the Vendor clicks this button, then the status of the venue is changed to unblocked.
Booking	Vendor	As a Vendor, I want to be able to view a booking list for my selected venue, so that I can see bookings under my venues.	Given the Vendor is on their venue page, when the page is loaded, then the system shall display a list of bookings for the selected venue.
User Management	Vendor	As a Vendor, I want to be able to view information about Hirers that are booking my venue, so that I have an understanding of who is booking my venues.	Given the Vendor is on their dashboard, when they select a booking, then information about the Hirer is displayed, such as compliance documents, name, and credibility score.
Booking	Vendor	As a Vendor, I want to be able to accept or reject any bookings made to my venues, so that I can accept the bookings I want, and reject the bookings I don't want.	- Given the Vendor is viewing their bookings, when they reject a booking, then the system will save the booking as rejected. - Given the Vendor is viewing their bookings, when they accept a booking, then the system will save the booking as accepted. - Given the Vendor accepts or rejects a booking, when the page is refreshed, the UI will update to display the updated status.
Reports	Vendor	As a Vendor, I want to view booking tallies for each one of my venues that I manage, so that I can understand which venues get booked by who.	Given the Vendor is viewing the dashboard, when the page loads, then the system will display a bar chart for each venue showing how many times each hirer booked.
Reports	Vendor	As a Vendor, I want to view a booking tally for each hirer combining all of my venues, so that I can see my hirer's history with my venues.	Given the Vendor is viewing the dashboard, when the page loads, then the system will display a big graph totaling all of the bookings for all of the venues for each individual hirer.
Reports	Vendor	As a Vendor, I want to view the hirer who has the least amount of bookings under my venues, and the hirer who has the most amount of bookings under my venues, so that I have an idea on Hirer activity.	Given the Vendor is viewing the dashboard, when the page loads, then the system will display a pie chart featuring the hirer with the least amount of bookings under the vendor's venues, and the hirer with the most amount of bookings under the vendor's venues, along with their names, and the number of bookings they have.
Reports	Vendor	As a Vendor, I want to view venue utilization over time so I can monitor venue performance.	- Given the Vendor is viewing the dashboard, when the page loads, then the system displays a line chart showing venue utilization over time. - Given the line chart is displayed, when the vendor selects a time slot, then the line chart displays within that time frame.
User Management	Admin	As an Admin, I want to log in using admin credentials, so that I can access the admin dashboard.	- Given the admin is on the log in page, when they input "admin" as the username and "admin" as the password, when the click log in, then it redirects them to the admin dashboards. - Given the admin is on the log in page and they have not filled out all the input fields, when they click the log in button, then an error occurs and a warning appears, telling the admin to fill out all fields.

			Given the admin is on the log in page and they have inputted the wrong user or password values, when they click the log in button, then an error occurs and a warning appears, telling the admin they have inputted the wrong values.
Venue	Admin	As an Admin, I want to assign venues to vendors, so that I can control which vendor owns which venue.	- Given the admin is on the dashboard, when the page loads, then a list of all the venues appears. - Given the system is displaying a list of venues, when the admin selects a vendor and clicks the "assign vendor" button, then the system displays the new vendor, and a success message. - Given the admin hasn't selected a vendor, when they click the "assign vendor" button, then the system displays an error message.
Venue	Admin	As an Admin, I want to be able to perform CRUD operations on all venues, so that I can create, read, update, and delete venues.	- Given the Admin is on the Admin dashboard, when the Admin selects a venue, then the system redirects them to a separate page and displays information about the venue. - Given the Admin is on the Admin dashboard, there will be an option to create a new venue. When the Admin clicks the create button, then the system will redirect them to a page allowing them to input information to create a new venue. - Given the Admin is on the Admin dashboard, when the Admin clicks the update button, then the system will redirect them to a page allowing them to input new information to update their venue. - Given the Admin is on the Admin dashboard, there will be a delete button. When the Admin clicks the delete button, then the system will remove the venue from the system.
Report	Admin	As an Admin, I want to be able to view the top three most popular venues, including the day and timeslot, so I can see which venue is the most profitable at which time.	Given the Admin is on the dashboard page, when they click generate report, then a report is generated displaying the top three most popular venues, and those venues most popular date and time slot.
Report	Admin	As an Admin, I want to be able to view the three most popular applicants, against their total submitted bookings versus their total successful bookings, so that I can see which hirers are most active.	Given the Admin is on the dashboard page, when they click generate report, then a report is generated showing the three most popular hirers, and their ratio of booking to successful bookings.
Bookings	Admin	As an Admin, I want to be able to put a venue's price down by 45%, so that hirer's can see when the venue price is on sale.	- Given the admin is on the dashboard page, when they click special, then the venues price goes down 45% in price. - Given the vendor is viewing their venue, when the admin puts the venue on sale, then the vendor can see it on sale, and view the new price. - Given the hirer is viewing available venues, when the admin puts the venue on sale, then the hirer can see it on special, and see the new price.
